WINNERS 2026

FOUNDER'S NOTE

The year 2026 marks a defining chapter in the technology evolution of the Middle East and Africa (MEA), a region rapidly transforming into a global hub for innovation, digital infrastructure, artificial intelligence, cybersecurity, and cloud-led enterprise modernization.

Artificial Intelligence has evolved from experimentation to enterprise-scale implementation in 2026. Organizations are embedding Agentic and Generative AI, predictive analytics, and intelligent automation into core operations across various sectors.

Another defining trend shaping 2026 is the expansion of hyperscale infrastructure, sovereign cloud ecosystems, and AI-ready data centers. The Middle East and Africa are attracting significant global investments from leading technology providers, reinforcing the region's role as a strategic digital hub connecting Asia, Europe, and Africa. From cloud-native public services to intelligent enterprise platforms, the region is creating a future powered by scalable digital ecosystems.

For over a decade, CIO CHOICE powered by CORE Media has stood as one of the most trusted and respected platforms recognizing technology excellence, enterprise innovation, and leadership across South Asia. Built on credibility, industry trust, and the voice of CIOs themselves, CIO CHOICE has consistently celebrated organizations and technology partners that empower enterprises through innovation, transformation, and customer-centricity.

Year after year, CIO CHOICE Trust Seal has brought together the region's most influential technology leaders, enabling collaboration, thought leadership, and recognition of excellence that shapes the future of the industry.

2026 marks the optimum time and year for launching the CIO CHOICE MEA platform in the Middle East and Africa region.

Our approach is deeply customer-centric. Every brand, platform, and initiative we craft is tailored to deliver unique, impactful, and results-driven experiences. Through bespoke programs, we empower our clients to communicate the right message, in the right format, to the right audience, ensuring engagement and meaningful outcomes.

Beyond transactions, our mission is to build lasting relationships, unite global communities, and generate ideas that are meaningful, timely, and impactful. With unwavering dedication, we consistently deliver exceptional results for our clients, time and again.

As the technology landscape enters a new era defined by AI-led enterprises, sovereign digital ecosystems, and intelligent transformation, the journey now extends beyond recognition toward investment, innovation enablement, and future-ready technology ecosystems. This vision is further strengthened through CXO Capital - a strategic initiative focused on enabling innovation, fostering technology-led growth, and supporting the next generation of transformative enterprises across the Middle East and Africa.

CXO Capital represents the convergence of leadership, innovation, enterprise technology, and future investments — creating a platform where disruptive ideas, visionary founders, emerging technologies, and enterprise ecosystems can come together to shape the next decade of digital transformation in the MEA region.

Anoop Mathur
Founder
CXO Capital

INTRODUCTION

What is CIO CHOICE?

CIO CHOICE is THE leading B2B ICT vendor recognition and trust platform, to recognise technology brands that have earned strong credibility and preference among the country's top enterprise technology decision-makers.

Designed for organisations across the Information and Communications Technology (ICT) ecosystem, CIO CHOICE offers a powerful platform to strengthen brand perception, market relevance, and customer confidence for their products, services, and solutions.

CIO CHOICE is not only an award, but a Gold Seal of Trust and Recognition - a distinction that reflects how a brand is perceived by the CIO community. For ~14 years now, it has stood as THE respected industry benchmark of excellence and trust in India's enterprise technology landscape.

Voice of the Customer

CIO CHOICE 2026 is powered by the collective voice of India's CIO community. Through a robust pan-India voting process, CIOs identify the ICT brands they trust most across products, services, and solutions. More than a recognition, it is the CIO Verdict, a reflection of credibility, preference, and customer confidence earned over time.

Selection and Voting

Stage 3 Process

ICT brands across large enterprises and small & medium businesses participate by entering their offerings under relevant technology categories. The process is guided by a distinguished CIO Advisory Panel comprising senior industry leaders and technology decision-makers from diverse sectors. Following this, participating brands are evaluated through an independent pan-India online CIO voting exercise, where enterprise technology leaders share their preferences across products, services, and solutions. The responses are consolidated category-wise to reflect trust, relevance, and overall customer confidence.

In each category, CIOs cast their vote for the products, services, and solutions they trust and rely on the most. The brand receiving the highest level of endorsement in its category is conferred with the CIO CHOICE 2026 title. To uphold the integrity of the process, the voting framework is backed by a secure and robust validation mechanism designed to ensure authenticity and fairness.

Winners across each category are authorised to use the CIO CHOICE 2026 insignia across brand communication, including packaging, promotions, advertising, marketing campaigns, and other brand communication for one calendar year. More than a mark of recognition, it serves as a strong symbol of trust and credibility within the CIO community — strengthening brand recall, reinforcing market positioning, and supporting business growth.

ADVISORY PANEL SPEAKS

"CIO CHOICE has earned deep trust among CIOs across India, backed by rigorous research evaluating partners on expertise, innovation, and customer-centricity. It serves as a powerful platform to connect with companies, suppliers, and emerging startups, all of whom play a critical role in driving digital transformation initiatives. Over the past 14 years, it has brought together technology leaders and partners, fostering collaboration and offering valuable insights into evolving tech trends. The journey has been meaningful and impactful, enabling better decision-making and partnerships. Congratulations to Anoop for this milestone and for building a trusted, forward-thinking community that continues to grow stronger."

Abdalla Ahmed Mohamed Al Ali, Director of Information Technology, DMCC

"CIO CHOICE has become a definitive benchmark where CIO voices drive credibility and trust. By spotlighting ICT brands that earn confidence through performance and innovation, it creates a seal of trust that resonates across industries. Recognition here is not just about visibility; it is about reputation, peer validation, and becoming the partner of choice. It empowers the CIO community with a trusted framework to evaluate ICT partners, enabling collaboration and accelerating digital transformation journeys. It bridges technology providers and decision-makers, ensuring investments are guided by confidence and collective experience. Anoop has always been a foresight-driven technology leader who deeply understands markets, platforms, and the evolving needs of CIOs, making him the true bridge between ICT partners and the CIO community."

Feroz Khan, Head of IT Security, Compliance & Projects, TotalEnergies

"CIO CHOICE stands out as a truly unique global platform that has consistently evolved over the years, and its 14-year journey reflects the deep trust and credibility it has built among CIOs and ICT brands alike. The passion with which the community comes together to recognize partners speaks volumes about its impact and relevance. It is more than just an event—it is a trusted ecosystem that fosters collaboration and recognition. Special appreciation to Anoop and his team for building this platform and for going beyond — acting as advisors, friends, and exceptional orchestrators. Their leadership and commitment have been nothing short of phenomenal."

Filip Nekvinda, Chief Information & Digital Officer, Abdul Latif Jameel Enterprises

"CIO CHOICE is fundamentally about recognizing the exceptional work being delivered by ICT brands and, more importantly, the trust and validation they earn from CIOs across the region. It creates a platform where brands receive the recognition, visibility, and credit they deserve for consistently delivering value and building confidence within the CIO community. CIO CHOICE 2026 reflects the trust and confidence CIOs place in ICT brands. As CIOs, we regularly seek peer perspectives and trusted experiences before adopting technologies or solutions. CIO CHOICE brings that collective validation into a more structured, transparent, and credible platform. It highlights brands that have proven themselves and are trusted by a wider community of technology leaders, making it easier for CIOs to identify the right partners and enabling valuable industry insights to come together in one place."

Mayank Bhargava, Group Chief Information Officer, Arada

"In an era defined by relentless digital acceleration, IT has become the engine of enterprise transformation—driving innovation, resilience, and measurable business value. Platforms like CIO CHOICE play a vital role in spotlighting this impact, celebrating the leaders and technology partners shaping India's digital future. Now in its 14th year, its credibility and influence remain unmatched. My compliments to Anoop and his team, their clarity, integrity, and passion continue to elevate the industry conversation. Together, we are shaping the digital foundations of the next decade."

Naushad Mohammed, Director - IT, VAMED

"CIO CHOICE is a brilliant and unique concept with a strong value proposition for the ICT ecosystem. As far as I know, it is the first platform in the Middle East and Africa region that empowers CIOs, the actual buyers and customers of ICT solutions to nominate and recognize their preferred providers. At a time when vendors make many claims of being best in class, CIO CHOICE offers a trusted community-driven sanity check before procurement decisions. I also rely on peer feedback before evaluating solutions, which makes this platform highly relevant. Anoop's vision and commitment to building this for the MEA CIO community is incredible and truly a gamechanger."

Kevin Neogy, Group Head of Digital Transformation, AI & Robotics, The Kanoo Group

"I had the opportunity to be part of the CIO CHOICE selection process, recognizing technology partners that are helping CIOs address critical business and technology challenges. What makes this platform valuable is that it brings forward the voice of CIOs who have firsthand experience working with these partners and have seen them deliver on their intended outcomes. The insights shared through this process help the broader CIO community identify organizations that are making a real impact in the market and provide valuable learnings that can be replicated across enterprises. CIO CHOICE serves as a credible peer-driven platform for informed technology decision-making."

Sreedhar Suragouni, Chief Operations and Technology Officer, Sukoon Insurance

"CIO CHOICE is a one-of-a-kind platform in the Middle East that celebrates brands delivering exceptional work, recognizing their efforts, and giving them the visibility they deserve. At the same time, it creates a meaningful bridge between technology leaders, CIOs, and service providers. In today's fast-evolving technology landscape, identifying the right partners, technologies, and services has become increasingly complex as business needs and market dynamics continue to change. CIO CHOICE addresses this challenge by enabling CIOs to make informed decisions through trusted peer feedback and shared experiences from the community. That collective insight makes this platform impactful, relevant, and truly valuable for the ecosystem."

Subodh Dubey, Group CIO, Easa Saleh Al Gurg Group

"In today's rapidly evolving digital landscape, the contribution of IT and digital teams in driving transformation across organizations is truly commendable. With strong support from technology partners, these teams continue to redefine business outcomes and innovation. CIO CHOICE stands out as a unique platform in India that not only recognizes such exceptional work but also offers valuable insights into what ICT brands are delivering across diverse domains. Its continued growth into its 14th year reflects the deep trust and credibility it has built within the industry. My compliments to Anoop and his team. His vision, approachability, and commitment to the CIO community are truly remarkable."

Veneeth Purushotaman, Group CIO, Aster DM Healthcare

"As a CIO, I see CIO CHOICE as a truly unique platform that recognizes the contribution and value of our technology partners — those who often work behind the scenes to enable operational resilience, digital transformation, and long-term business growth. Today, we cannot do everything internally, and trusted partners bring not only technical expertise but also strategic insights and specialized capabilities across infrastructure, cloud, and transformation initiatives. What makes CIO CHOICE powerful is that it brings visibility to these partners, creates opportunities to discover new and often unsung contributors, and strengthens collaboration across the CIO community in MEA. I have known Anoop for a long time, and the effort he puts into bringing the CIO fraternity together with technology partners is phenomenal. I'm happy to be part of this journey that fosters stronger partnerships and shared success."

Ramandeep Singh Viridi, CIO/CDO, Middle East and North Africa, Americana Restaurants

WINNING BRAND

AI POWERED ITSM

 **SymphonyAI**

Aditi Trivedi, Regional Sales Director & Head of Sales MEA, receiving the recognition trophy from Abdalla Ahmed Mohamed Al Ali, Director of Information Technology, DMCC; and Anoop Mathur, Founder, CXO Capital.

SymphonyAI is a global leader in agentic AI-powered ITSM and ITAM solutions for the enterprise. Leading global companies use its unified Apex platform to transform reactive, manual IT operations into proactive, intelligent service management. SymphonyAI is recognized by leading industry analysts including Gartner, Forrester, and IDC. Learn more at symphonyai.com.

"Being recognized at CIO CHOICE MEA for AI-Powered ITSM is a tremendous honour. This recognition from CIOs and IT decision-makers who work with these technologies every day validates our commitment to delivering AI-powered ITSM and Agentic AI solutions that create real customer value. As organizations across the MEA region move from experimentation to production AI, they need intelligent platforms like SymphonyAI to transform the IT and employee experience."

Charles Araujo
President Enterprise IT
SymphonyAI

About the Winning Product

SymphonyAI Apex Aspen is an enterprise-grade, AI-powered IT service management platform built on a unified data fabric, with intelligence embedded at every layer of the service lifecycle, not bolted on as an afterthought. Its agentic AI autonomously handles Tier-1 requests end-to-end, automates up to 80% of service requests, reduces mean time to resolution by up to 75%, and lowers analyst cognitive load by more than 60%, delivering a verified 204% ROI and \$3.2M net present value. With omnichannel self-service across web, mobile, Slack, MS Teams, WhatsApp, and zero code integration connecting 1,000+ enterprise applications, Apex Aspen enables enterprise IT teams to modernize service delivery and go live in weeks.

It delivers comprehensive IT service management capabilities through AI-powered incident, problem, change, asset, and knowledge management on a single unified platform. Powered by predictive analytics and real-time observability, it proactively identifies service risks, recommends remediation actions, and enables intelligent decision-making before issues impact business operations. The platform supports configurable workflows, policy-driven automation, SLA monitoring, and advanced reporting dashboards that provide complete visibility into service performance and operational health. Built with enterprise-grade security, governance, and scalability, Apex Aspen seamlessly supports hybrid and multi-cloud environments while extending service management beyond IT to functions such as HR, Finance, Facilities, and Customer Support, enabling organizations to standardize, automate, and optimize enterprise-wide service delivery through a single intelligent platform.

For More Information: <https://www.symphonypai.com/itsm/>

"SymphonyAI has set a strong benchmark in AI-powered ITSM through intelligent, scalable solutions that enhance service efficiency, automation, and user experience. Their innovation-led approach, combined with a clear focus on operational excellence and business impact, has positioned them as a standout winner in this category and a leader in transforming IT service management."

WINNING BRAND

CRM CONSULTING

Gabriel Ghossain, Country Manager UAE; and Samer Dahr, Sales & Presales Director, receiving the recognition trophy from Sreedhar Suragouni, Chief Operations and Technology Officer Sukoon Insurance; and Anoop Mathur, Founder, CXO Capital.

As a Salesforce Summit Partner, EI-Technologies MENA is the Middle East's premier force in CRM and digital transformation. Operating from hubs in Dubai, Abu Dhabi, Riyadh, Beirut, and Paris, we empower organizations to bridge the gap between vision and reality.

We don't just implement technology; we architect growth. Our consultants bring deep-tier expertise to the automotive, real estate, financial, and professional services sectors delivering everything from high-level strategic advisory to complex technical integrations. From initial design to long-term optimization, we partner with the customers to turn digital evolution into a competitive advantage.

"Being recognized with the CIO CHOICE Trust Seal for CRM Consulting is a significant milestone for EI-Technologies MENA. It reflects the trust of our clients and leading CIOs across the MENA region, reinforcing our commitment to driving impactful digital transformation through Salesforce. For us, CRM goes beyond technology; it is about creating meaningful customer connections, enabling innovation, and delivering sustainable business value. This recognition is a testament to our clients' confidence and our team's dedication to delivering innovative solutions that create lasting customer success."

Samer Dahr
Sales & Presales Director
EI-Technologies MENA

About the Winning Product

From cutting-edge AI-driven transformation to industry-specific precision, EI-Technologies MENA turns Salesforce into a powerful engine for growth. We specialize in the full Salesforce ecosystem—including sales, service, marketing, and data clouds, while leading the charge into the future of autonomous service with Agentforce.

By unifying data and automating complex workflows, we enable brands to deliver intelligent, personalized interactions at an enterprise scale. What sets EI-Technologies apart is the accelerator-driven approach. The company has built proprietary frameworks for the automotive, real estate, retail, logistics, and professional services sectors, allowing the customers to bypass common hurdles and go live faster with solutions built for specific operational reality.

At EI-Technologies MENA, they don't just deploy and depart. It focuses on long-term value creation, ensuring high user adoption and continuous optimization so technology scales as fast as the business.

For More Information: <https://www.neo-dis.com/ei-technologies-mena-dubai>

"EI-Technologies MENA's exceptional expertise in CRM Consulting is reflected through its customer-centric approach, strategic innovation, and ability to deliver impactful digital transformation outcomes. Their focus on building trusted client partnerships and enabling enterprises with scalable CRM solutions has positioned them as a reliable partner for organizations looking to strengthen customer engagement and business growth."

CUSTOMER INTERACTION SUITE

WINNING BRAND

Prasenjeet Shahi, Co-Founder; and Siddharth Mishra, Founder, receiving the recognition trophy from Veneeth Purushotaman, Group CIO, Aster DM Healthcare; and Anoop Mathur, Founder, CXO Capital.

Karnival is redefining how businesses engage with customers through its next-generation Smart E-receipt platform. Designed to seamlessly integrate with existing systems, Karnival transforms everyday transactions into powerful data and engagement opportunities.

By capturing key customer insights through interactive digital receipts, the platform enables brands to make smarter, data-driven decisions. Built-in capabilities such as NPS, ratings, reviews, and sentiment analysis empower businesses to address feedback in real time and better understand customer behaviour.

Karnival also enables highly personalized customer journeys across multiple touchpoints, including SMS, email, WhatsApp, surveys, and targeted ads. Brands can further enrich engagement by embedding dynamic content like product carousels, promotional messaging, and social media links directly within receipts.

"We are honored to be recognized for Customer Interaction Suite —a testament to our vision of transforming everyday transactions into meaningful customer experiences. At Carnival, we believe the post-purchase moment is a powerful yet underutilized touchpoint, and this recognition reinforces the impact of turning receipts into dynamic, data-driven engagement channels. Our platform enables brands to build deeper, more personalized relationships with their customers while maintaining the highest standards of data privacy and trust. This win inspires us to continue pushing the boundaries of innovation, helping businesses drive loyalty, unlock insights, and create lasting value from every interaction."

Siddharth Mishra
Founder & CEO
Karnival

Trusted by 300+ enterprise brands across 14+ countries, with a strong presence in the GCC, including LuLu Group International, Landmark Retail, Apparel Group and GMG and leading Indian players such as Titan, Tata Trent, Aditya Birla Fashion & Retail, Fabindia and Haldiram spanning offline and online retail segments.

About the Winning Product

Karnival transforms how brands connect with customers through its proprietary platform, Nebula. Moving beyond the traditional "smart receipt," Nebula converts standard transactional communication into a powerful marketing and retention engine.

Key Capabilities:

- Unified CX: Powers loyalty rewards and coupons, gamification, NPS, reviews, omnichannel customer profiling, and journey building in one Platform.
- Enterprise Scale: Features multi-language and currency support for global operations.
- Robust Governance: Built with encrypted data pipelines, role-based access, and full GDPR Compliance.
- Custom Development for Brands: Beyond its standard platform, Carnival also delivers bespoke, custom-built solutions tailored to each brand's specific requirements.

For More Information: <https://www.karnival.com/>

"Karnival's ability to transform customer engagement through intelligent automation, personalization, and seamless interaction management reflects the changing expectations of today's digital-first enterprises. Their innovative approach to enhancing customer journeys, improving engagement outcomes, and enabling meaningful brand interactions has positioned them as a leader in customer experience innovation."

Anoop Mathur, Founder, CXO Capital

WINNING BRAND

CYBER VAULT

PerpetuuitiTM

Rohil Sharma, Chief Executive Officer; and Team Perpetuuiti, receiving the recognition trophy from Mayank Bhargava, Group Chief Information Officer, Arada; and Anoop Mathur, Founder, CXO Capital.

Founded in 2011, Perpetuuiti is the resiliency partner of choice for 9 out of the top 10 companies listed on stock exchanges. Perpetuuiti is a leader in AI-powered enterprise resiliency automation, specializing in IT and cyber resilience offering true 1-click resilience invocation. Leveraging Agentic AI, delivering up to 80% reduction in recovery time objectives (RTOs), with increased efficiency and an average of 50% savings in operating costs. Renowned for serving major banks, insurance companies, telecoms, airlines, and stock exchanges globally, Perpetuuiti empowers organizations to be compliant, protect against data, business, and brand loss during technical glitches or cyber events by enabling rapid, data-driven responses and automated IT and cyber recovery – significantly enhancing operational resilience, which has now become a national security issue understood by many countries.

“Winning the CIO CHOICE recognition 2026 is a powerful validation of our commitment to helping enterprises achieve uncompromised cyber resilience in an increasingly volatile threat landscape. With Resilix, we are redefining how organizations protect their most critical digital assets—ensuring data remains immutable, isolated, continuously monitored, and instantly recoverable when it matters most.. This recognition from the CIO community across the Middle East and Africa reinforces our vision of building more than a cyber vault. We are honored by this recognition and remain committed to pushing the boundaries of cyber resilience innovation, empowering enterprises to operate with confidence, recover without compromise, and ensure uninterrupted business availability.”

Kaushal Shah
Regional Director - Middle East
Perpetuuiti

About the Winning Product

In a world where cyberattacks evolve faster than traditional defenses, enterprises need more than just backup—they need a vault that cannot be compromised. Resilix from Perpetuuiti is that breakthrough. Built as the intelligence layer within Perpetuuiti's Cyber Vault ecosystem, Resilix brings together immutability, isolation, and autonomous threat defense to keep your most critical data untouchable.

Resilix ensures that once your data enters the vault, it stays pure, protected, and tamper-proof. Every piece of information is validated, secured, and stored in an immutable format that no ransomware, insider threat, or malicious process can alter. Its smart architecture continuously scans for threats, identifies anomalies, and blocks suspicious activity before it can cause damage - delivering true always-on data safety.

Even in the worst-case scenario, Resilix empowers organisations to bounce back instantly. With self-protecting virtual drives and time-locked snapshots, businesses can restore operations within minutes, not hours or days. Its multi-cloud compatibility ensures seamless protection across on-prem and cloud environments, making resilience effortless and scalable.

Resilix isn't just a cyber vault - it's a shield, a watchdog, and a rapid recovery engine. Immutable. Intelligent. Indestructible. That is the power of Resilix.

For More Information: <https://perpetuuiti.com/>

“Perpetuuiti's strong reputation in cyber resilience, data protection, and business continuity comes at a time when enterprises are prioritizing secure and uninterrupted operations. Their solutions address the critical need to safeguard digital assets while enabling organizations to stay prepared against evolving cyber risks. This recognition reflects their continued focus on building resilient and future-ready recovery capabilities.”

Anoop Mathur, Founder, CXO Capital

DIGITAL TRANSFORMATION ENABLER

WINNING BRAND

Sanjeev Sadhwani, CEO, receiving the recognition trophy from Ramandeep Singh Viridi, CIO/ CDO, Middle East and North Africa, Americana Restaurants; and Anoop Mathur, Founder, CXO Capital.

Founded in 2020, Infoqort Technologies has rapidly established itself as a trusted technology partner in a digital-first world. With a growing footprint across India, the Middle East, Europe, and the US, it supports a diverse client base in navigating complex digital challenges and accelerating transformation. Our team of experts brings deep domain knowledge and a passion for innovation to every engagement. As a specialized Microsoft Partner, it delivers high-impact solutions across Data, AI, Business Applications, Modern Apps, and Infrastructure Operations, enabling organizations to adapt, scale, and thrive. With a focus on long-term value and measurable outcomes, Infoqort isn't just delivering technology, the company is building strategic advantage. Infoqort's work with 50+ clients worldwide is driven by a simple belief: progress happens when technology meets purpose. At Infoqort, they don't just imagine the future of enterprise — they help create it.

"We are honored to be recognized for our consulting excellence in Data and AI, powered by Microsoft Fabric. This award highlights our commitment to delivering intelligent, scalable solutions that drive tangible business impact. We sincerely thank Microsoft for their valuable partnership and the CIO community for their trust, collaboration, and ongoing support. Our gratitude also goes to Team CIO CHOICE for providing a credible platform that encourages insightful evaluations and healthy competition."

Sanjeev Sadhwani
CEO
Infoqort Technologies

About the Winning Product

Infoqort Technologies has been recognized at CIO CHOICE 2026 in the Business Intelligence category, a distinction that reflects its strong capabilities in helping enterprises transform data into meaningful business outcomes.

With a focused approach to modern analytics and enterprise intelligence, Infoqort Technologies enables organizations to move beyond conventional reporting and toward more strategic, insight-led decision-making. Leveraging its expertise and strong Microsoft alignment, the company delivers AI-driven analytics frameworks that empower businesses with actionable intelligence, faster decision cycles, and measurable impact.

A key strength of Infoqort lies in its ability to design and deploy modern data warehouses on Microsoft Fabric, helping enterprises simplify fragmented data environments and build scalable, high-performance analytics ecosystems. Its solutions are designed to ensure that business data is not only accessible, but also timely, relevant, and aligned to organizational goals.

Across sectors such as manufacturing, healthcare, retail, and financial services, Infoqort Technologies has consistently addressed complex operational and analytical challenges through a combination of advanced analytics, intuitive visualization, and robust data architecture. Its work supports organizations in turning data into a strategic business asset that drives agility, performance, and innovation.

What distinguishes Infoqort is its emphasis on long-term value creation. Rather than offering one-size-fits-all implementations, the company develops tailored data intelligence solutions that evolve with changing business needs and digital priorities.

For More Information: <https://infoqort.com/>

"Infoqort enables digital transformation through innovation, agility, and customer-centric solutions reflecting the evolving priorities of modern enterprises. Their ability to help organizations accelerate modernization while delivering measurable business impact has positioned them as a trusted partner in driving scalable and future-ready transformation initiatives."

WINNING BRAND

ENTERPRISE EMAIL

Pramod Sharda, CEO – India & Middle East; and Team IceWarp, receiving the recognition trophy from Kevin Neogy, Group Head of Digital Transformation, AI & Robotics, The Kanoo Group; and Anoop Mathur, Founder, CXO Capital.

IceWarp has emerged as the Middle East & Africa's trusted legacy alternative to global email and collaboration solution giants by enabling organizations to modernize workplace communication without compromising on security, performance, or user experience. Our unified platform combines enterprise email, collaboration, productivity, communication, and security in a single solution, helping organizations reduce licensing costs while improving operational efficiency.

Backed by 20+ years of innovation, localized premium support, regional data centres, and deep expertise in enterprise migrations, IceWarp has become the preferred choice for organizations seeking digital sovereignty, deployment flexibility, and exceptional customer service. Today, leading enterprises, government agencies, educational institutions, and fast-growing businesses across the region trust IceWarp to power secure, reliable, and future-ready collaboration.

This recognition reflects that IceWarp has become the preferred choice for CIOs seeking a single SLA and a single platform for email & collaboration.

“Being recognized with the CIO CHOICE Trust Seal for the first time in the Middle East is both a privilege and a profound validation of the trust the CIO community places in IceWarp. Recognition from the very technology leaders we aim to serve makes this milestone especially meaningful. It reflects our relentless pursuit of innovation, our unwavering focus on security and reliability, and our commitment to delivering collaboration solutions that truly empower modern enterprises. I would like to sincerely thank our customers, partners, and the entire IceWarp team whose dedication continues to drive this journey. As organisations accelerate their digital transformation, we remain committed to shaping the future of secure and intelligent enterprise collaboration.”

Pramod Sharda
CEO – India & Middle East
IceWarp

About the Winning Product

Over the years, IceWarp has evolved with a simple belief that technology should make communication easier, not more complicated. What began as a robust messaging platform has steadily grown into a comprehensive collaboration ecosystem that brings email, team communication, document sharing, and productivity tools together in one seamless experience.

As the workplace continues to transform, IceWarp has consistently advanced to meet the needs of enterprises. Today, the platform combines stronger security frameworks, advanced compliance capabilities, and AI-powered features designed to make every day work smarter, faster, and more intuitive. From intelligent threat protection to integrated collaboration tools, every innovation is guided by a single purpose: helping organisations communicate with clarity, security, and confidence. As AI continues to gain prominence across the tech landscape, IceWarp is evolving alongside. Think embedding intelligent capabilities that enhance productivity, streamline workflows, and enable smarter collaboration.

What makes this journey truly meaningful is the growing IceWarp community. Trusted by more than 50,000+ organisations, IceWarp continues to expand its presence across key industries. Each month, 10 or more organisations join the platform, with enterprises across sectors going live and becoming part of the expanding IceWarp family.

We have a strong network of partners and distributors across the Middle East and SAARC regions, with our Middle East headquarters based in Dubai. Our platform has a prominent presence among leading hospitality and healthcare organisations and is now steadily expanding within the IT sector, reflecting the trust placed in IceWarp in security-sensitive environments.

For More Information: <https://www.icewarp.com/>

“IceWarp’s secure, scalable, and collaboration-driven email solutions continue to enable seamless enterprise communication while addressing the evolving needs of modern businesses. Its strong focus on innovation, reliability, and user experience has made the company a trusted choice among enterprises and CIOs alike.”

INFORMATION SECURITY

ICDINFOSEC

Pranav Kumar, CEO; and Aqib Afzal, Sales Director, receiving the recognition trophy from Naushad Mohammed, Director – IT, VAMED; Feroz Khan, Head of IT Security, Compliance & Projects, TotalEnergies; and Anoop Mathur, Founder, CXO Capital.

ICD InfoSec is a leading cybersecurity solutions provider specializing in threat detection, managed security services, cloud protection, endpoint security, and cyber risk management. By combining deep security expertise with advanced technologies and real-time intelligence, the company helps enterprises build resilient, secure, and future-ready digital environments.

With a customer-centric approach and a strong focus on innovation, ICD InfoSec delivers tailored security strategies that address the unique challenges of organizations across industries. Its comprehensive portfolio encompasses security consulting, continuous monitoring, incident response, compliance management, and proactive risk mitigation, enabling businesses to stay ahead of evolving cyber threats.

"Being recognized by CIO CHOICE in the Information Security category is both an honor and a responsibility. It reaffirms our commitment to delivering trusted cybersecurity solutions that enable enterprises to innovate with confidence while navigating an increasingly complex threat landscape."

Pranav Kumar
CEO
ICD InfoSec

About the Winning Product

ICD InfoSec is a practitioner-led cybersecurity advisory and services firm that helps organizations reduce real-world cyber risk beyond compliance requirements. Its integrated portfolio includes vCISO advisory, Cloud and Application Security, Continuous VAPT, Digital Risk Protection, EDR, Email security, DLP, SASE, and DevSecOps. By combining deep technical expertise with executive-level governance, ICD InfoSec enables proactive threat identification, risk prioritization, and sustained cyber resilience across hybrid and cloud environments. The firm is distinguished by its ability to bridge security strategy with hands-on expertise to deliver measurable outcomes.

With a risk-first and outcome-driven approach, ICD InfoSec delivers continuous security validation, proactive threat monitoring, and security-by-design practices that strengthen organizational resilience throughout the technology lifecycle. Its team of experienced cybersecurity practitioners helps enterprises identify emerging threats, secure modern digital infrastructures, and accelerate secure cloud adoption while minimizing operational disruption. Leveraging industry best practices, advanced threat intelligence, and customized security frameworks, ICD InfoSec enables organizations to improve security maturity, enhance incident readiness, protect critical business assets, and maintain resilience against an increasingly sophisticated cyber threat landscape.

For More Information: <https://www.icdinfosec.com/>

"ICD InfoSec strengthens enterprise security through innovative, resilient, and future-ready cybersecurity solutions. Their ability to address evolving digital risks while enabling trust and business continuity has made them a deserving winner in the Information Security category."
